MANAGEMENT'S COMMENTARY ON THE FIRST SIX MONTHS

The group's value-adjusted equity at the end of June totalled NOK 26.3 billion (NOK 24.9 billion at 31 December 2014). The return on value-adjusted equity was NOK 1.6 billion in the first six months, equivalent to 6.6%. The Norwegian stock market posted a gain of 9.2% in the first six months of 2015, while Nordic stock markets posted on average a gain of 11.2% in Norwegian kroner terms. The business areas that made the largest contribution to the positive return for the first six months of 2015 were Ferd Capital and Ferd Invest, which together accounted for NOK 1.3 billion. Ferd Capital generated a return that was approximately equal in percentage terms to Ferd's overall return, while Ferd Invest's portfolio of Nordic shares produced a return of 13.3%. There was a high level of demand for commercial real estate for investment purposes and the market yield requirement for commercial property in Norway has fallen. Ferd Real Estate performed well in the first six months and achieved a return of 11.2% on its real estate portfolio. The portfolio of hedge fund units purchased in the secondary market at a discount to their stated value grew less strongly than in recent years. The portfolio's growth was virtually flat. Ferd's investments in externally managed private equity funds had a weak first six months, delivering a return of -1.2%.

Ferd invested slightly under NOK 400 million in the first six months of 2015. Ferd Real Estate's sale of a commercial building in Bergen that is let to Aibel was the largest single disposal. Ferd received approximately NOK 900 million in capital from disposals, payments from Ferd's fund investments and dividends. The group had no interest-bearing liabilities at the parent company level at the end of June.

The chart below shows the allocation of capital at 30 June 2015 in NOK million:

FERD CAPITAL

Ferd Capital is an active and long-term investor in privately held and listed companies. No purchases or sales were made by Ferd Capital in the first six months of 2015. Ferd Capital's portfolio at 30 June 2015 includes Elopak, Interwell, Mestergruppen, Servi, Swix, TeleComputing, Aibel and Petroleum Geo-Services.

Ferd Capital's investments are recognised in the unconsolidated accounts of Ferd AS at estimated market value. The portfolio's value-adjusted equity totalled NOK 9.7 billion at 30 June 2015 (NOK 9.3 billion at 31 December 2014). Ferd Capital's operating profit for the first six months of 2015 was NOK 537 million (NOK 474 million in the first six months of 2014). The investment that generated the highest return for Ferd Capital in the period was TeleComputing. Some of Ferd Capital's investments in other portfolio companies showed a strong performance, while no investment showed a weak performance. After adjusting for dividends, the return on Ferd Capital's investments was 6.0%.

FERD INVEST

Ferd Invest holds a focused portfolio of Nordic shares. Investment decisions emphasise analysis of the individual companies rather than geographic or sectoral allocation.

The value of Ferd Invest's investment portfolio at 30 June 2015 was slightly over NOK 6 billion (NOK 5.6 billion at 31 December 2014). Ferd Invest produced a return of NOK 715 million in the first six months of 2015, equivalent to 13.3% (9.7% in the same period in 2014). As the benchmark index delivered a return of 11.2% in the same period, this represents outperformance of 2.1 percentage points.

The largest investments in the portfolio at 30 June 2015 were Opera Software ASA, Novo-Nordisk AB, Autoliv Inc and Hexagon AB.

The chart below shows the allocation of the portfolio between stock markets as of 30 June 2015:

FERD HEDGE FUND

Ferd Hedge Fund invests in various types of hedge fund as well as in other funds. The hedge fund portfolio has a global focus and invests across a broad range of different investment strategies.

The market value of the hedge fund portfolio at 30 June 2015 was NOK 3.1 billion (NOK 2.9 billion at 31 December 2014). The hedge fund portfolio produced a return for the first six months of 2015 of 2.0% (in USD) compared to an increase of 2.1% in the benchmark index over this period (in USD). This is equivalent to a return in Norwegian kroner of approximately NOK 70 million (NOK 60 million in the first six months of 2014).

Ferd Hedge Fund has been given a new mandate in 2015 to invest in funds in addition to the hedge fund portfolio. The value of the portfolio at 30 June 2015 was NOK 250 million and it produced a return for the first six months of 2015 of 6.2% (in USD).

FERD REAL ESTATE

Ferd Real Estate is an active real estate investor. The business area has activities in the development of residential projects, the development and construction of new office buildings, and the development of warehouses. Ferd Real Estate carries out projects both independently and in collaboration with selected partners. It also makes purely financial investments in real estate.

The value of Ferd Real Estate's value-adjusted equity at 30 June 2015 was NOK 2.1 billion (NOK 1.9 billion at 31 December 2014), and the portfolio produced a return of 11.2% in the first six months of 2015.

Ferd Real Estate's operating profit was NOK 199 million for the first six months of 2015 (NOK 75 million for the first six months of 2014). The strong return was due to the sale of an office building in Bergen, the return achieved on a development project in Lysaker outside Oslo, and strong market growth in the real estate asset class.

Ferd Real Estate's largest residential project is Tiedemannsbyen. The project is for around 1,200 residential units, and will be carried out over a period of between 10 and 15 years. Sales of the residential units have proceeded well in 2015, and 65% of the units in the part of the site that is currently being marketed have been sold.

OTHER ACTIVITIES

Ferd's portfolio of hedge fund units purchased in the secondary market is being liquidated and will be reported as part of Other Activities from 2015 onwards. The comparative figures in the segment information have been presented accordingly. In the first six months of 2015 Ferd received over NOK 500 million from this portfolio, and the portfolio's growth was virtually flat for this period.

Other Activities also includes investments in externally managed private equity funds, including Ferd's investments in the Herkules Private Equity funds. Ferd's private equity investments produced a return of -1.2% in the first six months of 2015 (positive return of 4% in the first six months of 2014). Ferd's currency and interest rate hedging activities are also reported in the results for Other Activities.

BASIS OF PREPARATION OF THE INTERIM ACCOUNTS FOR THE FIRST SIX MONTHS OF 2015

BASIS OF PREPARATION AND MATERIAL ACCOUNTING PRINCIPLES

The annual accounts of Ferd AS are prepared in accordance with the International Financial Reporting Standards (IFRS) as approved by the EU. The accounting principles applied in the interim accounts for the first half of 2015, which ended on 30 June 2015, are the same as applied in the annual accounts for 2014. The interim report includes the unconsolidated interim accounts for Ferd AS and the consolidated interim accounts, which comprise Ferd AS together with its subsidiaries and associated companies.

The interim report does not include all of the information and disclosures required for the annual accounts, and the interim accounts should be read in conjunction with the annual accounts for 2014. The interim accounts have not been audited.

USE OF ESTIMATES AND ASSUMPTIONS

In connection with the preparation of the interim report and the application of Ferd's accounting principles, management has exercised its judgement and used estimates and assumptions that affect amounts recognised in the profit and loss account and in the balance sheet. The most important assumptions in respect of future events and other important causes of uncertainty in the estimates made, and which may represent a significant risk of material changes in future accounting periods to amounts recognised in the accounts, are described in the annual accounts for 2014. In preparing the interim report for the first half of 2015, management has exercised its judgement in the same areas.

SEGMENT REPORTING

Ferd reports business areas in line with how the Company's management makes, monitors and evaluates decisions. The operative areas are identified on the basis of the internal steering information that is periodically reviewed by management and utilised to the allocation of capital and resources as well as goal achievement.
